Roll No: _____   **Name:** _____

Q1. Given a list 'x' of integers and 'average' value of the list. Print elements of list less than average in single line than print elements of list larger than average in single line?

Q2. Given a list 'x', having unordered elements. Print all sets of consecutive 3 elements, which are in order:

Q3. Given a list 'x', having elements with -1 used as separator between elements. Print every set of elements, separated by -1 in reverse order, see example carefully. Suppose list is [2 3 6 -1 7 4 -1 8 9], the output will be:

6 3 2
4 7
9 8
